- [H5] Psyllium husk is a type of soluble and insoluble fiber that is commonly used in fiber supplements. It is derived from the seeds of the *Plantago ovata* plant and is known for its ability to absorb water in the digestive tract, resulting in smoother bowel movements. The main benefit of psyllium husk-based products is their ability to act as a bulk-forming laxative, which can help regulate bowel movements and relieve constipation. One of the most popular psyllium husk-based products on the market is Metamucil, which has been shown to be effective in promoting regularity and improving overall digestive health. Psyllium husk-based supplements are also associated with a number of other health benefits, including improved cholesterol levels and blood sugar control. Overall, psyllium husk is a highly effective and versatile ingredient that is widely used in the supplement industry for its numerous health benefits.
- [H5] Prunes have long been recognized as one of the best natural laxatives available, and many people drink prune juice for this specific purpose. But you do not have to eat prunes or drink prune juice to get those health benefits. The pure prune extract included here will deliver those same results.
- [H5] Oat bran is an excellent source of fiber. It is also considered to be one of the most IBS-friendly fibers available, and it is included in SynoGut capsules to promote better digestion and help avoid common IBS symptoms.
- [H5] *L. Acidophilus* helps prevent colic, upset stomach, constipation, bacterial vaginosis, lung infection and other irritable bowel syndrome. This ingredient is often found in supplements or products that focus on treating problems related to your stomach or intestines.
- [H5] Glucomannan is a source of dietary fiber that helps promote a strong probiotic presence. It also aids in glycemic control, which among other things gives you a greater sense of fullness after you eat.
- [H5] Flaxseed is one of the original super foods and is known to be used by the Babylonians circa 3000 BC. It provides a wide range of health benefits, is rich in nutrients and promotes good digestive health. Adding flaxseed to a modern diet can be a challenge, and it is much easier to take it in a supplement like this.
- [H5] Black walnut hull has long been used in Native American traditional medicine to treat constipation. It also expels parasites from the intestines and can improve skin health when ingested.
- [H5] Apple pectin has a great effect in increasing stool volume, thus helping the body to completely eliminate waste in your system. This important ingredient may also increase the body's
