- [H5] Turmeric is an anti-inflammatory, and antioxidant. The active ingredient in turmeric, curcumin, makes insulin more sensitive and reduces blood sugar. Turmeric can reduce inflammation, which is one of the major factors in diabetes. Turmeric's antioxidant properties protect the body from oxidative stresses that are common in diabetic conditions.
- [H5] The cocoa bean extract contains flavonoids, which are potent antioxidants. These compounds make insulin more sensitive and reduce oxidative stress. Cocoa flavonoids improve endothelial functions and reduce the risk of cardiovascular issues associated with diabetes.
- [H5] The berry of the juniper tree has been used for centuries to treat diabetes. It increases insulin production and glucose absorption by cells to regulate blood sugar. Antioxidant properties of the berry protect against cell damage due to high blood sugar.
- [H5] Banaba leaves lower blood sugar. Banaba's corosolic acid mimics insulin, allowing glucose to enter cells more effectively. This results in better control of blood sugar and a reduced risk of complications due to prolonged high glucose.
- [H5] Eleuthero, also known as Siberian Ginseng, is an adaptogen that helps the body to manage stress. Eleuthero
